Fly My Cloud Limited

Company No. 09756179

For All Your Cloud Computing Needs!

Cloud based application development, hosting, auto scaling servers, data analytics and many more….

Fly My
CLOUD

Cloud Hosting

Host your website or application in 1 click on the cloud. Improve the performance and reliability by hosting with Google Cloud And Amazon AWS in 1 Click!

Why should you switch to cloud hosting?

Cloud hosting is more reliable because your data is backed up in multiple locations

Using the cloud also saves money as fixed servers are expensive and will eventually go out of date as software changes.

Our auto-scaling feature enables you to only use the energy you need-so when you are not working your servers are using a smaller amount of space and when you need them at full throttle auto-scaling means your server space will expand to meet the demand. auto scaling enables you to use your resources in a much more efficient way.

Auto-scaling

Auto scaling-using our proprietary middleware software we can increase or decrease the server space that you use according to your specific requirements- which ultimately saves you money.

Application optimization-we help to improve your apps so that they work more efficiently in the cloud.

We offer a number of price packages to suit your needs on rolling monthly contracts. If you have a particular specification in mind we can offer bespoke packages at competitive rates.

Focus on What You Do Best

Auto scaling-using our proprietary middleware software we can increase or decrease the server space that you use according to your specific requirements- which ultimately saves you money.

We are a company that believes that your technological needs can be streamlined and improved using cloud based solutions.

Hashtags!

Key Offerings

We offer

- Data hosting in the cloud;
- Application development;
- Data Analytics; and
- Social Media Marketing

Our Vision

Our mission is to persuade all businesses to switch to cloud-hosting. We believe that the cloud is the best environment for hosting, email and data storage….so come and fly your cloud with us and see what we can achieve for you!

We believe in providing the best service for our clients possible. We provide value for money and support for your technological needs. We offer fixed price plans, but we are also flexible and can deliver bespoke packages that suit your specific requirements. Our 7 day refund policy means that you are not happy with our work within the first 7 days of signing up with us, we will refund your money in full.
